

— A GUIDE FOR PARENTS AND FAMILIES

Practise. Level up. Shine.

Sparkuna is a free practice world for students at Eduversal partner schools. Ten minutes a day of Maths, Science, English and Reading, with a companion who cheers your child on.

Free, nothing to buy

A mistake never costs a point

Not part of school grades

A little practice, every day.

Sparkuna was made by Eduversal for students at its partner schools. Your child signs in with their school Google account, chooses a companion and practises questions written by Eduversal for their grade. The more they practise, the more their companion and their own floating island grow.

Free

Nothing to buy,
no adverts

Grades 1–12

Primary and
Secondary

10 min

a day is
enough

≈14,000

practice questions
for every grade

Grades 1–3

- Maths and Science, with every question read aloud
- Reading: picture books that read to your child, word by word
- Play Lab: maths games and short maths stories
- No rankings at all: the youngest never appear on a board

Grades 4–6

- Maths and Science practice for the grade
- Reading: picture books with five questions each
- Play Lab: games, simulations and stories
- My Island and the Workshop, a block-building plot

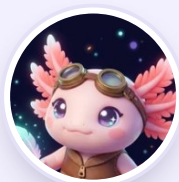

Grades 7–12

- Maths, Science and English practice
- English on levels from A1 to C1, set by a short placement test
- Morning Reading: a short story or article every school morning, about character and values
- Weekly leagues and the School Cup

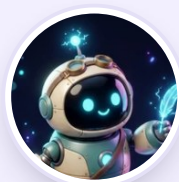

FIVE COMPANIONS TO CHOOSE FROM

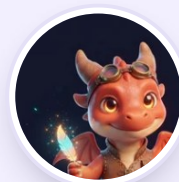

Sparky

Luna

Bolt

Ember

Capy

The companion stays with your child the whole time: it cheers after a right answer and explains after a wrong one.

What Sparkuna is not

Not a test

Mistakes are part of practice

Not a grade

Nothing goes into the report card

Not homework

No deadlines, no marking

Not social media

No chat, no posts, no strangers

Ten minutes, step by step.

Sparkuna works best as a short daily habit, at home or at school. This is what ten minutes usually looks like.

1

Sign in

Open www.sparkuna.com and sign in with the school Google account. A personal Gmail account will not work.

2

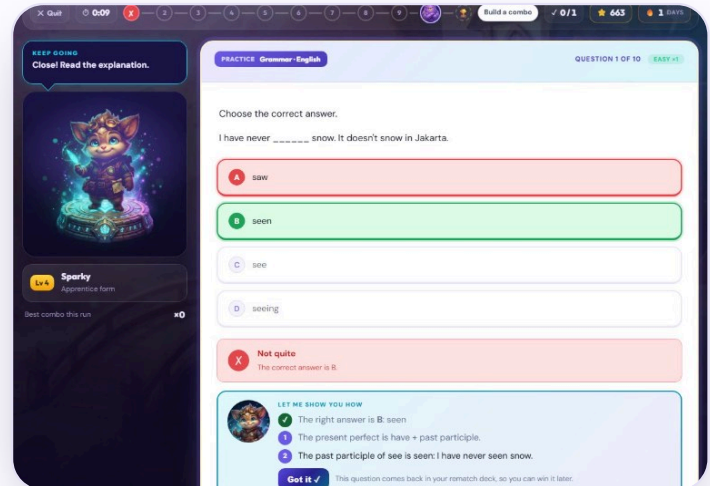

Today's Daily Challenge

Five questions, new every day, the same for everyone in the grade.

3

A practice run

Your child picks a subject and a chapter. The last question of every run is the "boss".

After a wrong answer, the companion explains the right one, step by step.

4

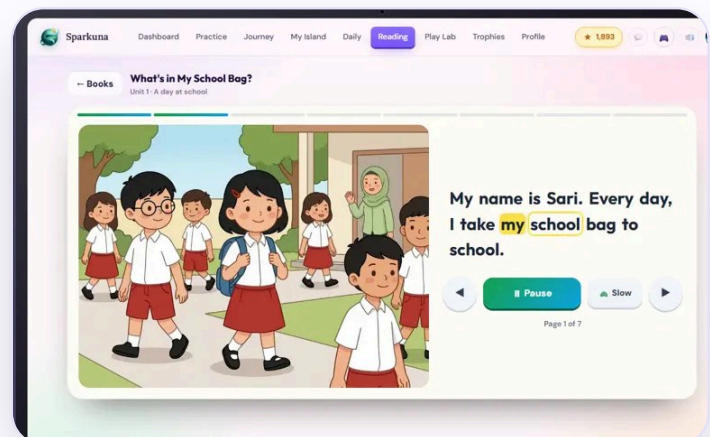

Wrong? That's fine

The companion shows how to solve it, step by step. The question comes back a few days later, so your child can win it next time.

5

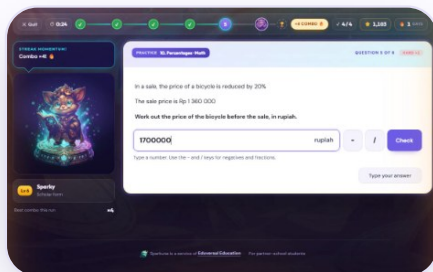

A new piece for the island

A finished, careful run earns a new piece for My Island, up to three a day.

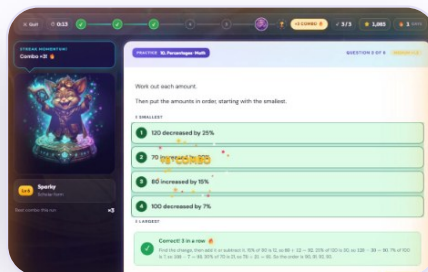

Grades 1–6: picture books that read aloud and light up each word.

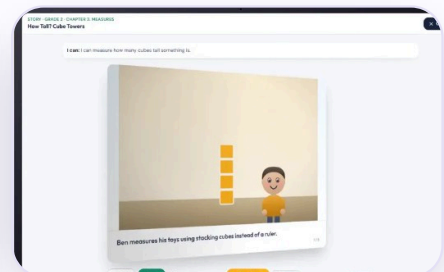

MORE THAN TAPPING AN ANSWER

Type the answer. A number box for whole numbers, negatives and fractions.

Put it in order. Move the cards from first to last.

Play Lab (Grades 1–6). Short maths stories, games and simulations.

Any device works. A laptop, Chromebook, tablet or phone with a modern browser. There is nothing to install and nothing to pay.

Effort counts more than the score.

In Sparkuna a wrong answer never takes points away. What matters most is the habit of practising carefully, so a child who finds the work hard still builds something every day.

My Island: every finished, careful run adds a new piece.

My Island

A run of five or more questions, answered without rushing, earns a new piece for your child's floating island: up to three a day. It rewards the effort, not only the right answers.

Streaks

Practising on several days in a row builds a streak. A streak freeze, earned by practising, can save it on a day your child misses.

Together with classmates

A weekly team quest for the grade, live classes with one goal for the whole class and, from Grade 4, friendly leagues and a School Cup.

Gentle for the youngest

Grades 1–3 keep their points, levels, medals and island, but are never ranked on any board or league.

THE COMPANION POWERS UP AS YOUR CHILD LEVELS UP

Level 35

Safe by design.

Sparkuna is a small, closed space built for practice. Each person sees only what their role needs.

School accounts only

Only students at Eduversal partner schools can sign in, with the Google account their school gave them.

No chat, no messages

There is no chat, comment or post anywhere. From Grade 4, a schoolmate who visits your child's island can leave only a silent heart, and your child can close the island to visitors.

Nothing to buy, no adverts

Sparkuna is free. Every reward, from a new outfit to a new form, is earned by practising.

Names are protected

Inside the school, boards show full names, as a class list would. Other schools see only a first name and an initial, such as "Rani S.". Email addresses are never shown.

Not part of grades

Nothing from Sparkuna goes into report cards or school assessments. It is practice, so mistakes are safe.

Teachers see effort

Teachers see how much each student practises and which questions the class found hard. They do not see a list of every answer your child gave.

Fair play

Every answer is checked on Eduversal's server, so points cannot be changed, copied or bought.

Something looks wrong?

Under every question there is a report button. Eduversal checks every report and corrects the question where needed.

Who sees what

Your child	Everything of their own: points, level, island, Workshop build, and the explanation for every question they answer.
You	Only if your child shares it, the Family card: that week's effort (days, careful runs, chapters, books, island). Never answers, points or rank.
Schoolmates	Your child's full name and points on the school's boards. From Grade 4, their island on a visit (never the Workshop build).
Other schools	Only a first name and an initial, such as "Rani S.", in leagues and the School Cup.
Teachers	How much each student practises, the chapters they work on and their share of right answers; which questions the grade found hard.
Grades 1–3	Their names appear on no board at all, not even inside their own school.

How you can help.

You do not need to know the answers. Your interest is what helps most.

01

Short and regular

About ten minutes, at the same time each day. A little every day helps more than a long session once a week.

02

Ask, don't test

Ask your child to show you their companion, their island and today's Daily Challenge, and to send you their Family card link (Profile → Family card).

03

Praise the habit

"You practised every day this week" helps more than "Why only seven out of ten?"

04

Let mistakes happen

A mistake costs no points. Encourage your child to read the companion's explanation and win the question next time. "I don't know this yet" is a good answer too: it is honest, and the question comes back later.

05

Sit beside the youngest

In Grades 1–3, questions and books are read aloud. Listen together and talk about the pictures.

06

Let your child do the work

A small hint is fine. Answering for your child hides what they still need to practise.

Questions to ask your child

- “ Which companion did you choose, and what form is it now?
- “ What did you add to your island this week?
- “ Which question did your companion explain to you today?
- “ What did you read this morning, and what did you think of it?
- “ How is our school doing in the School Cup? (Grades 4–12)

A good week with Sparkuna

Sun

if they like

Five short days are a great habit, and Sparkuna is built for short practice: island pieces stop at three a day. A missed day is not a problem: a streak freeze can save the streak, and nothing your child has earned is ever taken away.

Good to know.

Does Sparkuna cost anything?

No. Sparkuna is free for students at Eduversal partner schools, and there is nothing to buy inside it.

Does it count towards my child's grades?

No. Nothing from Sparkuna enters report cards or school assessments.

Is it compulsory?

Schools encourage about ten minutes a day, but a student is never penalised for not practising.

How much screen time is right?

About ten minutes a day is enough. Sparkuna is built for short practice, not for long sessions.

Which devices work?

Any laptop, Chromebook, tablet or phone with a modern browser. Nothing needs to be installed.

My child cannot sign in.

Check that they are using the Google account the school gave them, not a personal Gmail account. If the school account is refused, please tell the school.

My child chose the wrong grade.

The grade is locked after the first choice so that leagues stay fair. Ask the school: Eduversal can correct it, and nothing your child has earned is lost.

Can my child talk to other people?

No. There is no chat, comment or post anywhere in Sparkuna, and only students with a partner-school account can sign in.

Why can my child see other students' names?

Boards inside the school show full names, as a class list would. Students at other schools see only a first name and an initial. Email addresses are never shown.

Is the English level an official certificate?

No. The level (A1 to C1) only chooses which practice questions your child sees. It is not a CEFR result or an English grade.

Can I have my own parent account?

Not at the moment. The best way to see Sparkuna is together with your child, on their screen.

A question looks wrong.

Ask your child to press the report button under the question. Eduversal checks every report.

Do the questions match what my child learns at school?

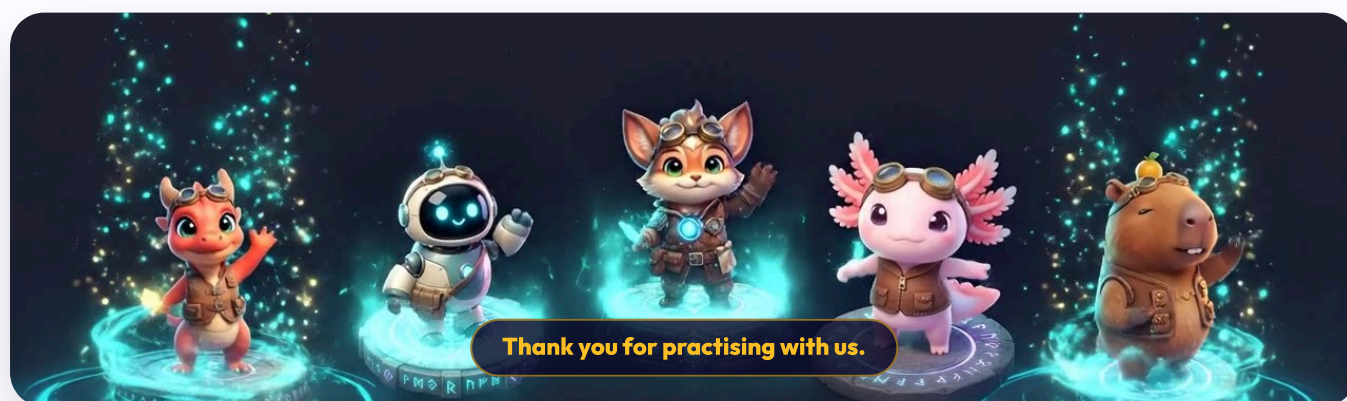

The questions are written by Eduversal for each grade and arranged by the chapters students study. Teachers can also suggest a chapter for the week, which your child sees on their home page.

At home or at school?

Both work. Some schools give time in class or homeroom; at home, about ten minutes is enough.

Who do I contact with a question?

Your child's school. The school passes questions on to the Eduversal team.

Three steps, ninety seconds.

1

Open
www.sparkuna.com

On any laptop, tablet or phone.

2

Sign in with the school
account

The Google account the school
gave your child.

3

Choose a grade and a
companion

The grade is chosen once. Then
the first Daily Challenge is
waiting.
